

Welcome to

SAMIM FASHION LTD

History

The journey of SAMIM FASHION LTD. began with a handful of sewing machines to produce all kind of woven /knit products . It is one of the modernise full infrastructure including modern machinery and equipment. Sincere efforts, constant strive towards efficiency and commitment towards highest level of quality fueled the growth of Samim Fashion to become one of the iconic ready-made garment industries .

Mission

At SAMIM FASHION, we strive to provide world class service and the best value to our customers. We thrive for excellence and work for ensuring a pleasant, clean and professional working condition for our employees and the people we do business together.

Strength

The strength of SAMIM FASHION lies in its facilities, skilled human resource and management. Following are some of the highlights

Exclusivity:

We focus on the specific needs of our customers, placing great emphasis on meeting and exceeding their expectations.

Technology:

We robustly believe in supporting new and innovative technologies and we work tirelessly to implement fresh and inspired solutions for our products, processes, and infrastructure and work environment programs.

Promptness:

Sample and delivery times are fast! We strive to provide you with great value, fast turnaround & superior pricing.

Seamless Improvement:

We value the commitment to excellence, both in our day to day operations and our overall performance as an organization.

Innovation:

We are constantly creating new brand products that anticipate our customers' needs through joint research and development, and collaboration with our customers and suppliers.

Go Green:

As part of a world wide community, we are dedicated and responsible actors within the environment that surrounds us.

Regular and rigorous training for every employee has been made mandatory for him/her to achieve acceptable level of performance.

Availability of modern machinery and equipment that can cater the diverse requirements of customers

Ample storage and computerized inventory management system at every factory facility

Centralized research and development activity as part of continuous strive towards raising product quality and productivity, improving efficiency and cost reduction.
